

Elk Grove Unified School District

Class Title: Computer Training and Support Specialist III

Basic Function:

Under the direction of the Desktop Support and Helpdesk Manager, serve as a technical resource to district personnel. Manage both small and large scale technology projects. Administer technology related solutions, services and software. Demonstrate a broad knowledge of technology through both education and years of experience. Install, configure, troubleshoot, maintain and repair personal computers and personal computing devices. Develop and conduct technical training for district personnel and for other technicians.

Distinguishing Characteristics:

The Computer Training and Support Specialist III job classification is responsible for supporting personal computers and related technology for systems running Microsoft Windows, Google Chrome OS and Apple Mac OS. As a third-level technician, applicants are expected to have a broad knowledge of technology and technical support in an enterprise environment. The Computer Training and Support Specialist III will often be called upon to manage both small and large scale technology projects including software and hardware rollouts, deployments, application and operating system upgrades, as well as new technology implementations. Successful candidates will demonstrate professional behavior and serve as a resource for other members of the Desktop Support and Helpdesk teams. Individuals will provide support and guidance to other team members as needed.

Essential Functions:

Serve as a technical resource to District personnel, answering phone calls, email requests and other inquiries, providing technical information, advice and referrals.

Manage both small and large scale technology projects.

Install, maintain, administer, and support computers and related technology equipment including but not limited to: data storage devices, printers, plotters, scanners, network switches, data cabling, and other peripherals.

Travel to District sites to troubleshoot both hardware and software.

Perform component replacement and repairs on computer hardware as appropriate.

Assist personnel with the setup, maintenance and troubleshooting of computer applications as directed.

Develop and conduct technical training programs in the operation of computers, application software and other solutions. Prepare a variety of instructional materials including presentations, documentation and manuals. Conduct advanced classroom training on technical topics. Prepare reports related to training activities.

Prepare and maintain records and reports related to software analysis, studies, testing, selection criteria and assigned activities. Prepare documents related to the inventory of computer parts and equipment.

Operate a variety of office equipment including telephone, fax machine, copier, computer, and common productivity software.

Operate a vehicle to conduct work.

Consult with vendors, service providers, and technical support regarding the purchase of parts, status of repairs, software and hardware related questions.

Perform other related duties as assigned.
